---

While working in a customer service role at Tesla, I grew frustrated at our process of contract generation, which at the time was slow and prone to errors. I decided to teach myself to code in order to build a tool to do the tedious parts of my job. After struggling to build my tool, then convincing management to use it, I realized that this was how I wanted to spend the rest of my career. I cashed in some Tesla stock, signed up for a boot camp, and now spend my time writing code, learning new technologies, and building web sites.

## WORK EXPERIENCE

---

**ICF International**  
Web Developer

**Sept 2021 – Present**  
*Fairfield, VA (remote)*

- Developer for [DoD Demographics](#), a custom WordPress site for the US Military. On this project I coordinate with my team (Project Manager, data scientists) and other third-party government contractors. As the only "technical" person on my team, I also document my process (tooling, local setup, dev site setup, required credentials, etc.).
- Worked on [Hiv.gov](#) to make the site safe and accessible and bring the site into 508 compliance.
- Participated in Agile stand ups, and built many custom components, wrote unit tests, participated in code reviews, and pushed code to our GitHub Enterprise account on a US Navy site built with Reactjs/Nextjs frontend.
- Working 100% remotely, juggled several projects, managed deadlines, and coordinated with various stake holders. Currently on four separate projects with various technologies (including Wordpress, React, Salesforce, and others).

**Dark Mountain Tech**  
Web Developer

**Feb 2021 – Sept 2021**  
*American Fork, UT*

- Built custom WordPress sites for small businesses. Met with clients, set expectations, and met with them regularly to make sure we were all on the same page.

**Tesla**  
Sr Agent, Property and Title

**Dec 2017 – Feb 2021**  
*Draper, UT*

- Built and updated software tools for the Property and Title team, including tools for document generation and a custom Chrome extension.
- As a Property and Title Agent, I project managed the transfer of solar contracts from home seller to home buyer. I interfaced with sellers, buyers, real estate agents, title agents and lenders. This position required heavy phone and email communication.

## SKILLS

WordPress	JavaScript ES6
HTML5	CSS3
React.js	Node.js
Next.js	RESTful Apis
PostgreSQL	MongoDB
Git/GitHub	AWS

## INTERESTS

Ironman triathlete  
Hiking  
Dogs  
Quotes from The Office
